# Tool support

Over the years, students have developed a number of tools for using George and/or editing `.grg` files, such as plugins for Vim and Atom. Check them out at

Course website → George User Manual → Contributions

## George mode for Emacs (new!)

- Syntax highlighting + a number of convenience functions
- Grab it from <https://git.sr.ht/~bandali/george-mode> (soon on Contributions page)

Walk through answering a00q01.grg and submitting on MarkUs

# Homework 1

- Let's do a couple of questions from Homework 1
- Now you try the rest, let me know if you have any questions

# Homework 1
